**WATERTEC**

VRH

Global Footprints : Middle east | Africa | Southern Asian | SAARC

WATERTEC provides a great experience of Bath Spaces with their high-quality products. WATERTEC in-house, experienced professional design team is well integrated in its approach to design innovative products. Our state-of-the-art manufacturing units are backed by a world-class testing lab conforming to the highest quality and regulatory standards.

WATERTEC is prominent in Mid segment and now ventures into Premium segment with innovative designed product portfolio. By providing Smart Hygiene Solutions with faucets, bath fittings, accessories, Sanitary Ware, Pipes & Fittings and many more, WATERTEC is set to increase their portfolio of products with great designs, affordable cost, Innovative R&D Designs and Pre & Post Sales Service.

## NEWS AT GLANCE

### Kanthal® Award winner 2018: Bharat Energy Storage Technology

### Dr. Fixit introduces revolutionary building envelope solutions for roof & walls

■ The building envelope refers to the external walls, windows, roof and floor. A building's envelope, especially roofs and walls, contribute to as much as 28% and 45% of the energy loss in buildings. Good thermal insulation for the envelope is crucial to prevent heat from seeping in through the exterior of the building. Most buildings unfortunately don't offer adequate thermal insulation for the building envelope thereby unnecessarily enhancing its energy usage, carbon footprint and lifecycle costs.

Dr. Fixit, the construction and the waterproofing expert, announced the launch of building envelope solutions for roof and walls for better thermal insulation of the building.

■ Congratulations to Bharat Energy Storage Technology (BEST), winner of Kanthal® Award 2018. The Indian start-up company was awarded for their pioneering work in sustainable energy technologies. BEST is active in the High-Density Energy Storage field and are planning to open the world's first thermal battery plant in May 2019, where they will build high energy density storage devices made of renewable material only and designed to last for as long as 25 years, far longer than lithium ion batteries.

### Opening of KMP Express opens to new possibilities: NAREDCO

■ Kundali-Manesar-Palwal (KMP) Express is emerging as one of the most important Indian long distance expressways which connect Kundli in Sonapat in the North East to Manesar in Gurugram and to Palwal in South West.

Welcoming the opening of KMP Expressway NAREDCO Vice Chairman Parveen Jain Said "Today, Prime Minister Narendra Modi inaugurated it and made a new beginning for the development of the region. Opening of KMP Expressway will increase the development activities in this part of the NCR and this will benefit the common people of this entire area."

Parveen Jain, President NAREDCO Haryana & CMD, Turip Infrotech
